

Preventative Care Visit

Five Easy things we call "Light Planning"

1. Today is your pet's yearly preventative care visit. The cost for today's services and time with Dr. Lane is \$250. It includes:

- Examination and Consultation around how your pet looks, sounds, and feels TODAY.

-Dogs: heartworm test

-Indoor Cats: kidney and thyroid check

-Outdoor Cats: infectious disease test

- Fecal parasite test
- Any vaccines for a year (expires one year from today)
- Other services are additional expense.

2. We recommend all pets be protected against heartworms, fleas, and ticks with monthly prevention. Currently, the best product for the job is Simparica Trio for dogs and Revolution Plus for Cats. ~\$170

Can we get some to send home with you today?

3. We recommend checking your pet's bloodwork to monitor key indicators of well being and organ function. ~\$200

Would you like to do this: Today? Schedule in 6 months? or Decline?

4. Would you like to schedule your pet's yearly sedated exam and dental cleaning? ~\$606

5: Required: Let's make a plan to see you next year for your pet's preventative care visit.

As smaller, intimate practice, we can only have so many patients. By scheduling before you leave, you ensure your spot in our tribe and help us to plan for the future.
